Command line basics

Using the Terminal

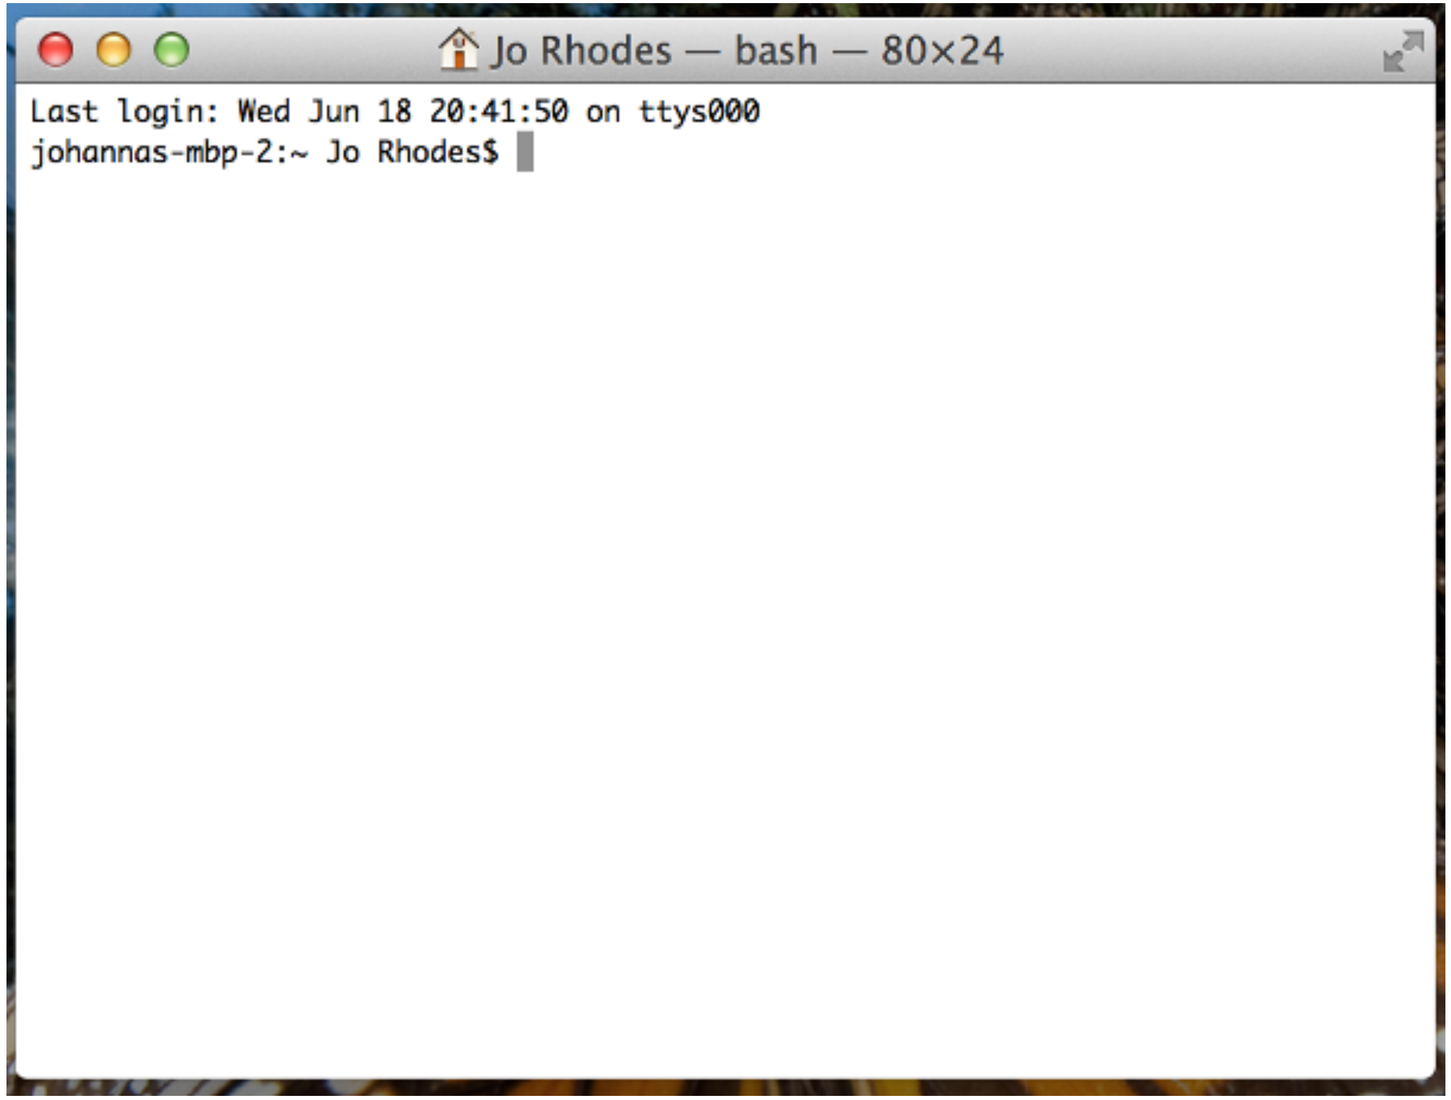
Dr Johanna Rhodes

Learning outcomes

- **Understand how Terminal works**
- **Learn basic commands for navigating Terminal**
- **Learn basic commands for working with NGS data**

Terminal

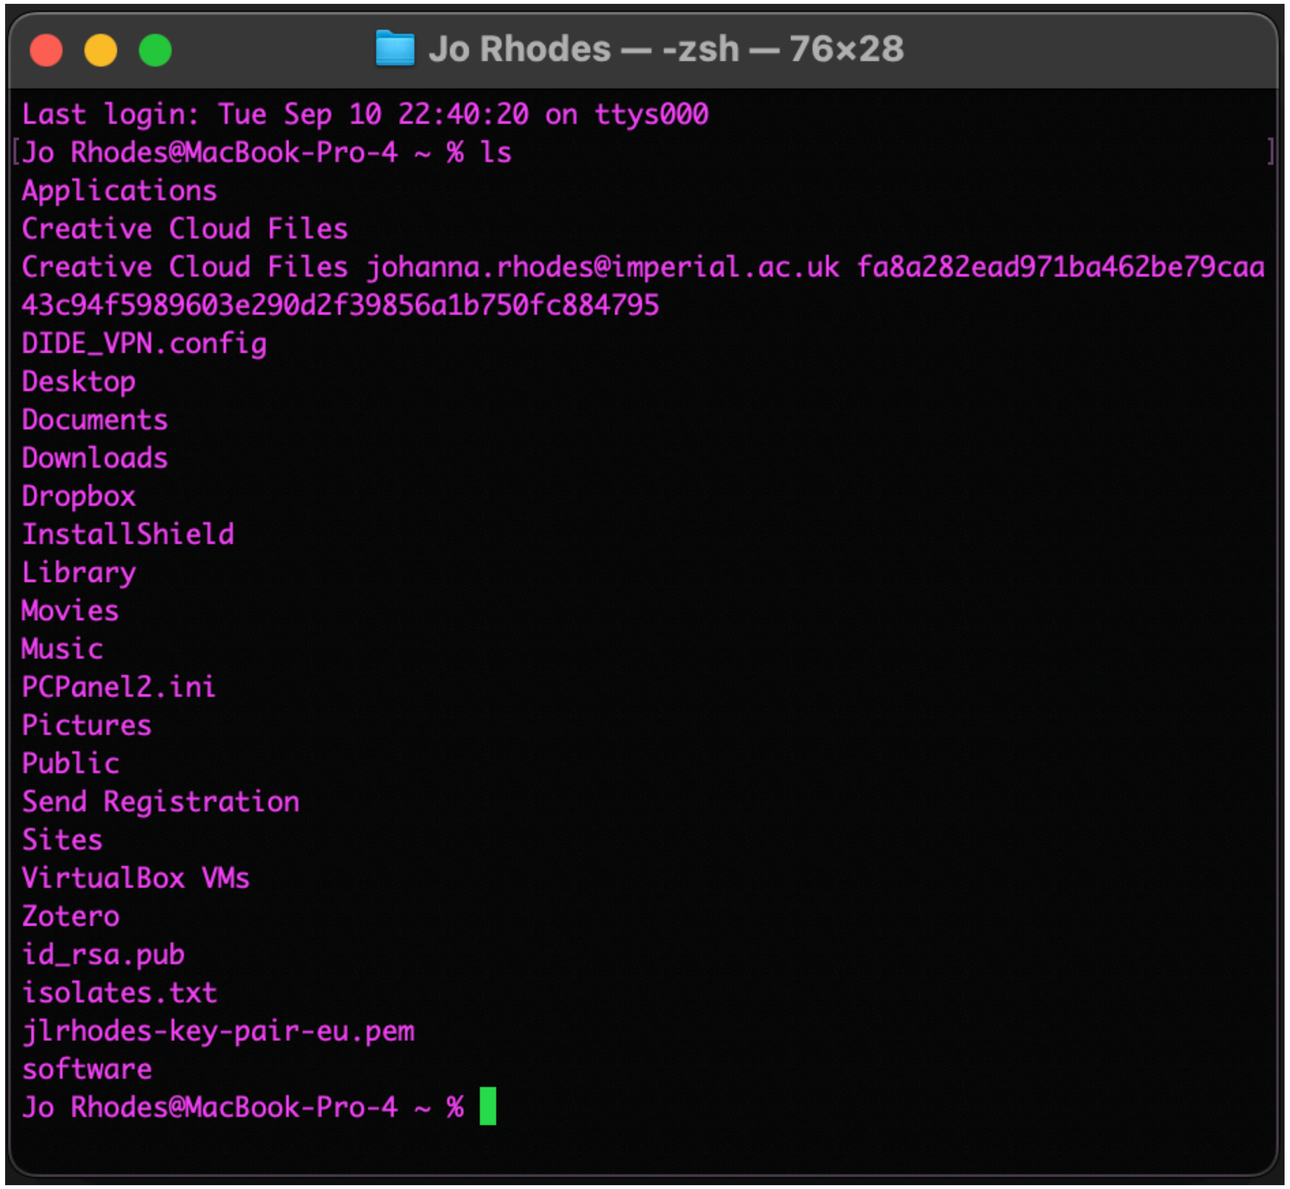
Command-line interface (CLI)



Terminal

ls

Writes standard output of content of directory



```
Jo Rhodes@MacBook-Pro-4 Wadworth % ls -lh
total 0
drwxr-xr-x  6 Jo Rhodes  staff   192B 18 Jun 23:34 Nanopore
drwxr-xr-x  5 Jo Rhodes  staff   160B 10 Sep 21:54 RNAseq
Jo Rhodes@MacBook-Pro-4 Wadworth %
```

ls

Options include -l or -lh for more information

Terminal

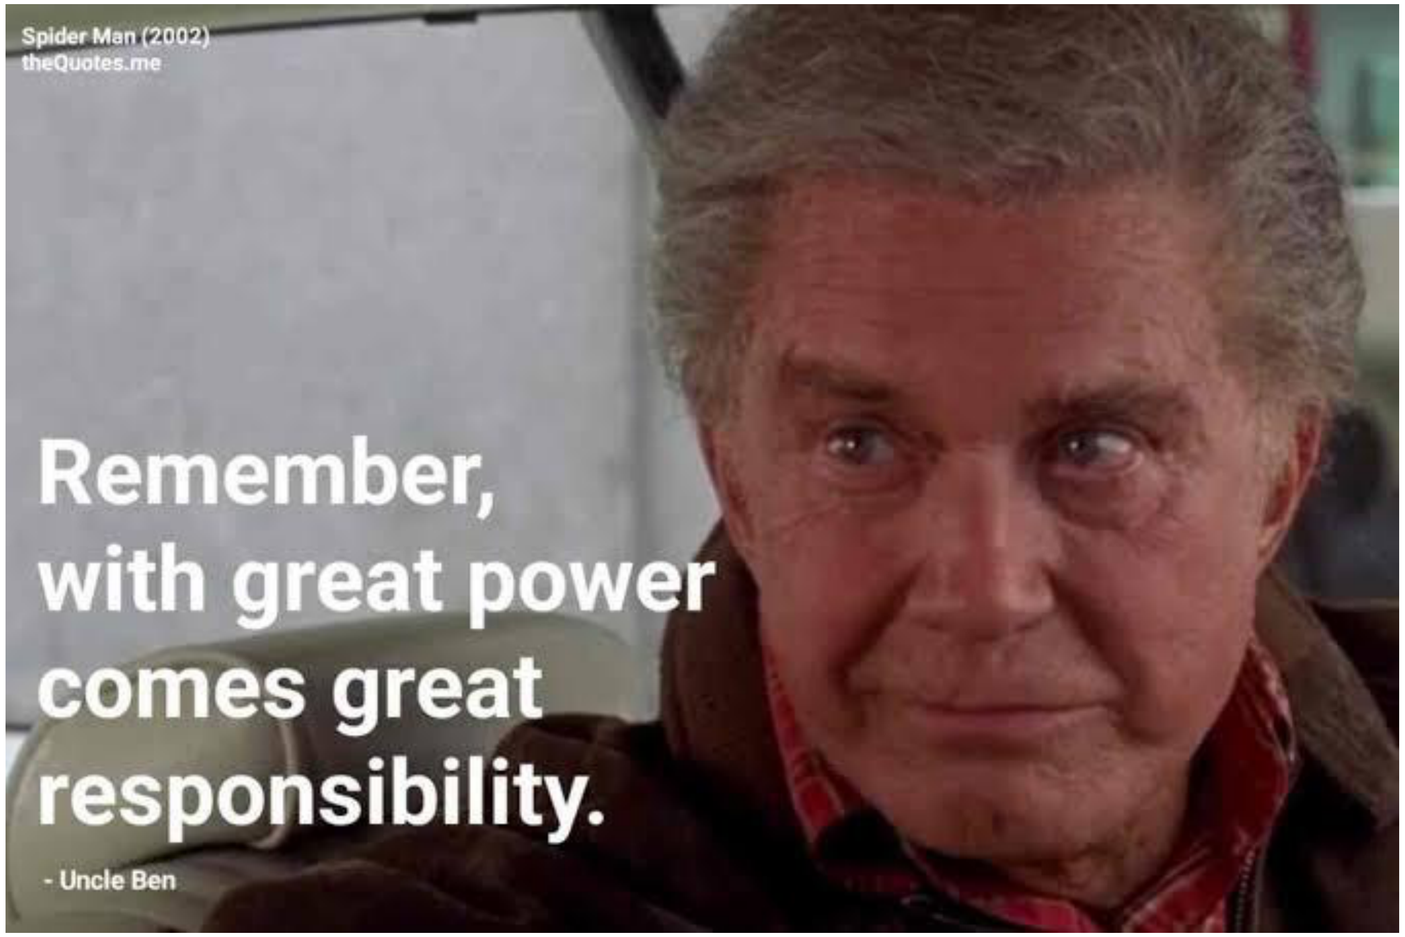
Commands

- **cd**
  - Change directory
- **mkdir namefolder**
  - Create a new directory called ‘namefolder’
- **rmdir namefolder**
  - Remove folder (as long as it’s empty)
- **pwd**
  - Print current directory and path

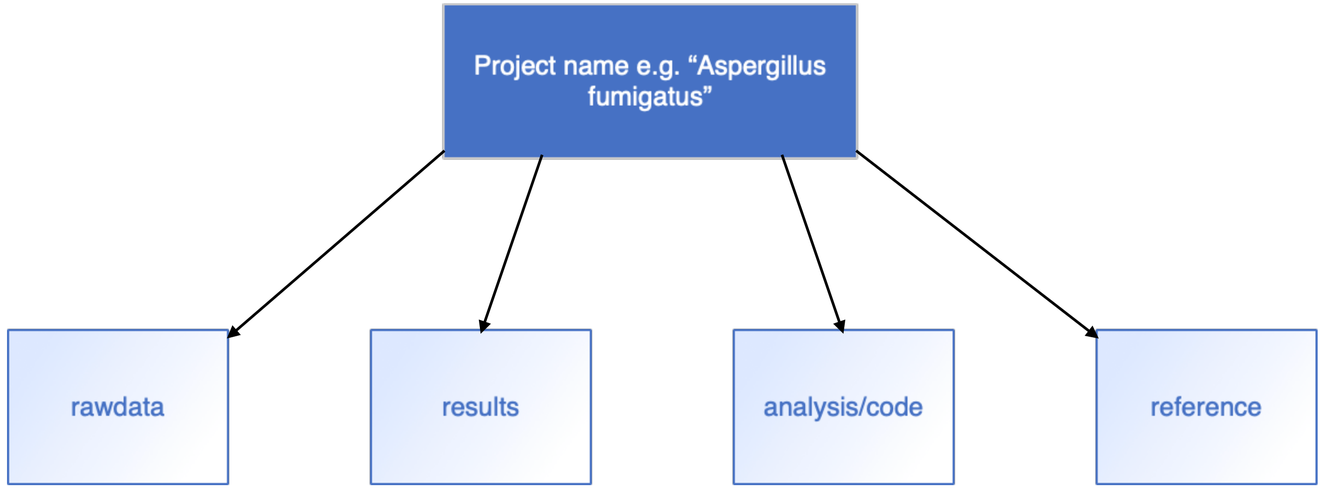
Terminal

Commands

- Case sensitive!
  - ‘pwd’ not the same as ‘PWD’ etc



Terminal

Project directory structure


- Personal preference!
- But good to keep organised
- Each project can have a ‘readme’ file containing details of start/end of project, collborators, funders, basics of project
